# INTERACTIVE SPORTS REBOUND NET

*The Kangaroo Kage is made from high-density polyethylene “intelligent” netting with memory capabilities. It’s designed to return a ball that’s thrown, hit or kicked into it, no matter what sport you’re playing. The Net is made from Turnbuckle screws allow the user to adjust the tension of the netting, enabling you to control the force of the return of the ball. The Net can be used for most ball sports on any of its four sides simultaneously. For Golf it has a second impact net inside which allows the ball to roll back to the front of the net (using one ball). The Kangaroo Kage measures 2m (6.5 feet) x 2.2m (7.2 feet) x 2.8m (9.2 feet) and comes with target, baffle and side barrier net for extra protection. It is safe, easily moved and easy to assemble with detailed (coloured and numbered) instructions.*

*Features and benefits of the Kangaroo Kage:*

- **Bright vibrant colours** – kids love the bright colours especially the bullseye target.
- **Easy to follow detailed instructions** – easy for the family to put together.
- **Additional carry bag with wheels** (separate carton) – easily transportable.
- **Strong and durable** (tested in New Zealand weather conditions) I have had one outside for 3 years and kids climbing into it.
- **Good for a variety of ball sports** – families love the versatility.
- **Great for all the family** – parents can practice their sports too.
- **Drop Net** – impact net for the golfers in the family.
- **Versatile** – different sports for individuals, schools or instruction class.
